DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to a device for delivery of an intraluminal prosthesis, classified in class 623, subclass 1.11.
 - II. Claims 20-38, drawn to a method for emplacing a prosthesis loaded into a sleeve, classified in class 128, subclass 898.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in materially different process such as delivery a prosthesis in aorta of human body and not limited to the method steps as claimed.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3731

5. During a telephone conversation with Nicole Bradley on 8/26/2002 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-19. Affirmation of this election must be made by applicant in replying to this Office action. Claims 20-38 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Note: This application is a divisional of 09/503,618, which now U.S. 6,344,044, where there was a restriction applied, Applicant elected method claims. However, this present divisional application also included the original method claims, which have been previously examined.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 3-5, 13, 14, 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Palermo et al. (U.S. 5,800,455).

Palermo et al discloses in figures 1-7, an outer shaft (at 118) having a securing member (110) at its distal end; wherein said outer shaft (at 118) disposed within a sleeve (120) and movable relative to said sleeve (120); wherein a prosthesis (100) is housed within said sleeve (120) and said prosthesis (100) is secured to said outer shaft by said securing member (110); an inner shaft (106) disposed within said the outer shaft (118).

Allowable Subject Matter

8. Claims 2, 6-12, and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record disclose or suggest the traumatic tip having at least one side port for bleeding contrast.
